

Have you ever wondered why someone in your family is so interested in family history? It's because they want to know more about their ancestors - where they lived, what they did, how many brothers and sisters did they have and what their school was like? Answers to all these questions lead you on a detective trail back in to history; and the best people to answer these questions are granny and grandpa or uncles or aunts.

The sooner you start asking questions, the better! Make sure you have a notebook to record all their answers and stories!

Soon you will be able to draw your first simple family tree - or ask someone to help you to do it. For those a little older, there are useful books in which to record all your findings.

## Once you are underway what next?

### Join a Family History Society

Anyone can join! **We** are the Nuneaton & North Warwickshire Family History Society and everyone is welcome whether your family comes from north Warwickshire or elsewhere. If you are under 18, bring a parent or adult with you to the meeting and enjoy researching! It's good fun!

We have monthly meetings and we have helpdesks in different places in our area where you can ask experienced people for help.

*This leaflet, based on one by the Dorset Family History Society, is produced by NNWFHS to encourage research into family history.*

For full details and much more information, go to our website.
